

Data Use Certification
Laboratory of Neurogenetics (LoNG) at Duke University

Collaborators of the LoNG desiring to utilize data maintained by the LoNG must complete this form. The use of Dunedin Brain Imaging Study (DBIS) data and samples is subject to the terms and conditions set forth below. Please read this document carefully.

The term "DBIS data and samples" used throughout this document is defined to include without limitation all clinical, behavioral, neuroimaging, and genetic data acquired and maintained by the LoNG. All copyrights to these DBIS data and samples are the property of LoNG. No part of these DBIS data and samples or the information contained therein may be used, copied, altered, modified, uploaded, posted, transmitted, distributed, licensed, sold, reproduced, or republished without the prior written consent of the Director of the LoNG, Professor Ahmad R. Hariri.

Irrespective of whether I have obtained prior written consent of Professor Hariri for use of the information provided by the LoNG, or whether my use of the information and services herein is for private purposes within the scope of the law, I nevertheless hereby agree:

- I will make no attempt to identify or contact any individual study participant except in situations where the participant has to be called back for retesting with the prior approval from the Director of the LoNG, Professor Ahmad R. Hariri.
- I will not make any attempt to perform facial reconstruction from MRI data to identify the subject.
- I will make sure to use appropriate safeguards to prevent use or disclosure of the information other than as provided in the agreement.
- I will not redistribute original DBIS data and samples or data derived from the original DBIS data and samples.
- I will not use the DBIS data and samples for any purpose other than research agreed upon.
- I will encrypt all portable (laptop) computers that contain DBIS data and samples information using NIST FIPS 140-2 approved encryption.
- I agree to provide all study results to the Director of the LoNG, Professor Ahmad R. Hariri, at the conclusion of the investigation.

Unless otherwise specified, by accessing the DBIS data and samples, I and the LoNG agree that all matters relating to my access or use of this data (including without limitation, the validity, interpretation and legal effect of this Data Use Certification) shall be governed by and construed in accordance with the following:

- The principles and policies of Duke University Medical Center (DUMC) IRB [1]
- Regulations outlined in the DBIS Standard Operating Procedure document for Data Sharing.

By signing below, I certify to abide by all the terms described in this Data Use Certification.

Name: _____ Date: _____

DISCLAIMER: The LoNG takes great care in providing the most accurate and complete information, content and services as possible, however it cannot guarantee the quality and completeness of the data. Users employ these data at their own risk. The LoNG disclaims all warranties as to the accuracy or the completeness or the performance or the fitness of the data for any particular purpose.
